

# Mouse Genome Informatics Workshop

**Location:** 212 Memorial Student Center  
Texas A&M University  
College Station, Texas

**Date/Time:** Thursday, 20 March 2008  
9:00-11:00 a.m.  
*(if session fills, an afternoon session will be added)*

**RSVP:** e-mail: [jpursley@tigm.org](mailto:jpursley@tigm.org) or phone: (713) 677-7401

**PLEASE BRING YOUR OWN LAPTOP with wireless capability. If you do not have access to a laptop please let us know when you RSVP.**

In this workshop you will explore the MGI database in depth. You will use MGI to identify:

- mouse models of human disease;
- single nucleotide polymorphisms (SNPs) and strain specific mutation;
- quantitative trait loci (QTL) associated with a specific phenotype;
- mouse markers, alleles and phenotypes mapped onto a genome browser;
- gene expression data for specific anatomical structures and developmental stages;
- gene annotations using Gene Ontology (GO) terms.

For more MGI information
